

Italy

Gaia Sindoni. Born in 1967.

Gaia Sindoni is a painter and Illustrator. Her artistic activity sees committed accomplishments of pictorial works on various media, original techniques with the experience of many years of work.

The early years of the activity involves

the artist mainly from the graphic point of view and photography. The first exhibitions of painting, made with satisfaction after her studies, are attended by an audience attentive and sensitive.

Composition and color are the two pillars of the future production of Gaia, two artistic excellence of her art that characterize the best performance. The cultural attending of the artist, in mature age bring near Munch and Chagall, even though her production is strongly characterized by great creativity, and by the exceptional sensitivity with which illustrates her fantasy world.

Gaia enters in her home planet for narrating us from time to time new adventures, for amazing us with her mythical characters who recall with sadness our childhood memory. The beauty of the last paintings confuses the spectator. The fine line between fantasy and reality, to paraphrase the title of her masterpiece, kidnaps the spirit and drags our soul. The artist in every manifestation interprets our weaknesses and our fears. The painting of Gaia is an ancestral location, a deep review of our being, a moment of meditation and reflection for all.
