

Denmark

Hanne Falk, born in 1948. Autodidact artist with polish and swedish roots. Degree in visual arts 1999. In the ninteens, studied art at Art Academy Aarhus and Randers Art School. Occasionally I'm still studying at proffesional artists, obserbing various techniques. I work freely and experimentally with various

techniques, using acrylic paints and many layers. Small images - Big dreams - Artmoney 12 x18 cm. Registrered artmoney artis since 2014. Exhibited home and abroad occasionally. My canvas are hard cardbord or watercolor paper. Often I implement different materials to obtain a complete images. To me, working with artmoney is magic - a feeling - a thought and a way to fertilize my fantasy. I' m very inspired by Dalsgaard, a famous, lokal painter (who died 1999), by nature, by political movements and by living. To me, Artmoney also are a message to art lovers, giving the oppotunities to buy original and unik art very shep, or to start an artmoney collection. Creating my own money by art, increases the volume of my world, gives great experiences and developing new friendship. Painting artmoney gives me plenty of joy, and gives me the feeling of creating a bridge, bringing artist from difference part of the world together. I'm addicted to work with art, because in here, I can explore my feelings, visualise my dreams , experiment and turne thoughts into art. Working creativly has been my world from childhood, and to me, working with art, is breating mentally. Artmoney are the most artistic

currency in the world and I'm proud to contribute with my artmoney at European Art Museum and to reprecnent a concept, with seams still to increase after 20 years.
