Digital Art-Printing on Canvas

Karin Monschauer. I was born in Luxembourg 1960.
Since my early years of high school, my passion for mathematics and
figurative compositions has led me to develop my art with the
technique of embroidery. At first, I embroidered my jumpers with
designs of my own creation. Then, at the end of my schooling, I
started producing geometric figures and experimented with the half
cross-stitch technique, playing with vibrant colour tones. Since 2010,
I have been creating paintings with art and design computer
programs. The knowledge of these software packages has allowed the
creation of canvases with colours and shapes that were not possible
with the half cross-stitch technique. The ability to use digital art tools
allows me to develop my art more and more.
