

Italy

Katia De Rosa, born in 1975.

Diploma in Public Graphic Design.

I started working at the family business at 19, dealing with artistic stained glass.

Over the years I have deepened my knowledge of different techniques including glass fusing.

The picture here is part of a collection of 6 other paintings, each of which represents through colors, moods, emotions and love stories.

"Armonia" represents the introspective journey of the

soul, in search of inner calm.

Looking at the picture we can see two images that represent a hypothetical man and a woman and through the colors feelings are expressed, emotions such as harmony, complicity but also the desire to take risks and to live fully every moment.

Technique: Glass fusion Rome 2019
