**ARTIST STATEMENT** Experience beauty, a union of most intimate experiences and emotions, the fascination with nature as well as with a relatively relation. My painting is a message evolving around emotions, eternal to some degree, primary, one could say... It is the fascination, the ability to perceive and ship with another human being. I express in my painting the concerns and risks that result from a fleeting structure of circumstances defining our everyday lives. Painting is the realm of communicating expression and emotionality that are a common theme of sorts in my paintings - the awareness of impermanence. Sometimes my painting has a dramatic form,

emphasized with a contrast color of varying intensity of the hue. The structure of our existence is very fleeting and frail; it takes an effort to cultivate it... Our experiences are ephemeral and transitory... and everything passes irrevocably
