

Russia / Germany

In 1960 I was born in Russia during the beautiful autumn season on September 15th. 1980 I have as Dip. Engineer in the field of heat engineering. In 1998 I moved to Germany. Time 2014 I am severely handicapped and exactly from this point I started my colorful life as an artist. The inspiration for all my paintings is the joy of my life and I try to Forget the physical and mental pain.

That is why my pictures radiate with positive energy and convey the lust of life, the desire to create new. When people see my pictures, you can not believe that they are painted in the most difficult time of my life. My pictures are my children, the world for the pleasure of the beholder on tour - it is my goal to delight the people with my pictures! "

My painting style is original and unique - a mixture of realism **and** magical fantasy!

I am grateful to art-loving people from different countries, from all over the world, where my paintings have found their new home.
