Ramón Rivas, born 1953.

The founder / creator of the artistic Rivismo It is a mixture of several different artistic techniques. His works of art contain many stories / interpretations. Here are fairy tales and philosophy united in a great silent tale - and here is no list of facts, as here are many possible answers. It is the quirky approach to the concept of art he understands and exploits. Looking back at art history, it is certain that many of the old masters have influenced / inspired him to where he stands today. There is a fight present in his motives. Something that is strong and something that is weak nevertheless finds all its balance as in the symbol of Yin and yang. His style is both modern and old-fashioned, which is a kind of clockwork not forgotten. It emerges in a new mission. Compare Ramón Riva's images with water that is able to change from the solid lining as ice to the airy form as steam to the liquid lining. The same element with many stages that is what makes can work for art. So short and precise it can be said.

Curator Leif Nielsen

"Experiential Cubes and Jars" 50 x 50 cm.
