Siclari's technique is ingenious. He takes everyday subjects and transforms them into thin glazes of translucent, shimmering color to evoke moments of sublimity. Siclari has been painting and exhibiting internationally since the 1960s. His work covers a vast

range to include figures, flowers, landscapes, cities, nudes, boats, portraits and even small-scale Sculpture.

By *Jill Smith* New York "Francesco Siclari: A Natural World.

Siclari's painting deserves recognition, as does that of other artists, for having kept faith with a tradition that has marked the growth of art over the last five centuries.

Averse to fashion and to ephemeral trends , Siclari has sought within his own soul, and continues undaunted to seek, the fertile seeds of beauty, painting a world wich is how the world should be.
